ESE-01 | Decorative panel

DXF geometry - units: mm - front view - print scale 1:5

13 closed contours | 12 openings | open area 50.64%

The DXF uses separate closed polylines: CUT_OUTER and CUT_INNER. No toolpaths.

Example dimensions. Print at 100% to retain 1:5 scale. Do not measure from the screen.

Material, thickness, minimum details and cutting settings must be confirmed with the workshop.

The visualisation uses 3 mm thickness and illustrative supports: it is not a structural check.
